To calculate FFL multiply the sum of Total Consumption and Total Other Charges amounts by 0.3% for England and Wales or 0.8% for Scotland. Please note that from 1/4/02 the FFL rate for England & Wales will be reduced to zero. FFL is not subject to VAT.

## HOW TO CALCULATE NON HALF-HOURLY CHARGES

- To calculate the number of Billed Units (electricity consumed) deduct the present meter read from the previous and multiply this figure by the multiplier (Multi).
- Non half-hourly meters may have up to six registers. The time periods these refer to are stated on your invoice. Where more than one register has been used to generate a charge this will be shown. In such cases the Billed Units of each register for a particular time period should be summed together to give the 'total' Billed Units.
- Multiply the Billed Units by their respective Price to calculate the Cost.
- The total (Consumption) is the consumption for all the registers for the period of use. The total cost associated with the total consumption is stated.
- Multiply the Billed Units of the Standing Charge by the Price (if applicable).
- Multiply the Billed Units of the Capacity Charge by the Price (if applicable).
- Add together the Standing Charge and Capacity Charge to get the Total Other Charges.
- Apply CCL at the rate specified on your invoice unless any reductions apply.
- VAT is applied at Standard Rate unless any exemptions apply.
- The sum of these calculations amounts to the Total Electricity Sales.
