2. INTRODUCTION

Model No. VS7010 Designed to attach to the oil filter housing on VAG FSi petrol engines. Allows the filter housing to be drained before removal, preventing spillage. Use in conjunction with a suitable oil drainer. Model No. VS7110 Features a control valve fitted to the bottle and hanging chain.

3. OPERATION

- 3.1. With the vehicle on a suitable ramp drain engine oil.
- 3.2. Locate the oil filter (black plastic housing).
- 3.3. Remove the dust cover on the bottom of the housing to expose the red bleed valve.
- 3.4. **VS7110** - Secure drain bottle using the retaining chain and open valve, on top of the drain bottle.
- 3.5. Screw the adaptor into the end of the plastic housing. Screwing in the adaptor will release the red bleed valve in the filter housing which allows the oil to drain.
- 3.6. Once fully drained unscrew adaptor.
- 3.7. The filter housing can now be removed from the engine using the large hex located at the bottom of the filter housing.

4. MAINTENANCE

Keep the unit clean, wipe off any fluid spillage. Keep the tubes clean and clear of blockages. Check that all tubes and connections are in good condition.

ENVIRONMENT PROTECTION

Recycle unwanted materials instead of disposing of them as waste. All tools, accessories and packaging should be sorted, taken to a recycling centre and disposed of in a manner which is compatible with the environment. When the product becomes completely unserviceable and requires disposal, drain any fluids (if applicable) into approved containers and dispose of the product and fluids according to local regulations.

Note: It is our policy to continually improve products and as such we reserve the right to alter data, specifications and component parts without prior notice.

Important: No Liability is accepted for incorrect use of this product.

Warranty: Guarantee is 12 months from purchase date, proof of which is required for any claim.
